

#701B/#801B L-TRIM

APPLIED AFTER PANEL INSTALLATION TO FINISH VENEER PLASTER EDGES AT WALL TERMINATIONS

Veneer trims 701B and 801B are L-shaped trims designed for use at junctions of veneer gypsum base with rough concrete or masonry ceilings. Sized to fit 1/2" and 5/8" gypsum plaster base, 701B provides 3/32" grounds for two-coat veneer, and 801B has 1/16" grounds for one-coat veneer plaster. Available in standard length of 8' and 10'.

- Mini-mesh flanges for keying.
- Eliminates shadowing.
- Galvanized coated for corrosion protection
- Also available in [zinc](#)
