White Aluminum Soffit Vents

4" X 16" 100854

8" X 16" 100862

2" X 8' 100846

These under eave vents are intake vents that allow air to enter the attic. As an essential component of a ridge vent system the under eave vent provides the other half of the air movement equation by creating a balanced attic. 8-mesh aluminum screen. Heavy-duty aluminum construction.

The soffit vent is an intake vent that allows air to enter the attic. It installs in the eave to provide 9 sq. in. of net free area per linear foot. The intake vent is designed to balance with the exhaust ridge vent. Retrofit design for standard rafter or manufactured truss construction. Louvered. Double leg return. 2 In. x 8 Ft. Aluminum construction.
