## Commodities Update:

- **Panel products:** OSB remains tough to source as of this writing with mill order tiles out well into October. With the hurricane season upon us, supply will be constricted further. The good news, if there is much, is that prices are not continuing to increase. SYP plywood is showing signs of weakening a bit as well even though mill order tiles are out to mid October and the recent hurricane has shut down some mills temporarily.
- Dimension lumber may have gotten to its peak also, although some dimensions are near impossible to source (2X4X10 & 2X6X10 to name a few). The prices are still extremely high, but the increases may be stalling. The November futures market price is down considerably indicating the price corrections may be around the corner.
- Gypsum supply and demand is the next looming problem. Demand has been very high and manufacturers are out around two weeks on deliveries and because of this, they've announced a 10% increase effective 10/19/20. The Fall is a busy time of year for gypsum and this year especially so. Controlled allocations have not yet been announced, but could be on the horizon. Please plan your gypsum needs with us so that we can have the product you need when you need it.
- USG has also announced an October 26 increase on all interior finish products (joint compounds, etc) although the amount of the increase is not known at this time.
- Steel studs will also be increasing next month with a 10% increase on October 1. Our vendor has also announced a 10% increase for November 1 as well.
- Fiberglass insulation, as previously reported, will increase 4% on October 1 and our retails will reflect that increase later this month.

## New Inventory items:

Hot water heaters and accessories is a line we will begin selling in the coming months with most of our initial stock coming in January 2021.

Dewalt 20V Max VR 15 gauge 2-1/2" angled cordless finish nailer kit

## Words Worth Reading:

This is what we are about.

We plant the seeds that one day will grow.

We water the seeds already planted.

Knowing that they hold future promise.

We lay foundations that will need further development.

We provide yeast that produces effects far beyond our capabilities.

We cannot do everything, and there is a sense of liberation in realizing this.

This enables us to do something, and to do it very well.

It may be incomplete, but it is a beginning, a step along the way, an opportunity for the Lord's grace to enter and do the rest.

We may never see the end results, but that is the difference between the master builder and the worker.

We are workers, not master builders, ministers, not messiahs. We are prophets of a future not our own.

Archbishop Oscar Romero

## Quote To Think About:

THE SMALLEST ACT OF KINDNESS IS WORTH MORE THAN THE GRANDEST INTENTION.

*Oscar Wilde*

## Brain Builder: See if you can figure it out!

True story-My son Phil, in his youth baseball days, pitched a complete inning throwing only three pitches- and one of those pitches hit the batter. How is that possible?

Go to [www.ilionlumber.com](http://www.ilionlumber.com) for the answer!

## Hardware humor:

After a while, Tony found it advisable to wear his hard hat even after he got home from work.
