### Commodities Update:

- As of this printing dimension lumber, seems to be in a holding pattern-no substantial increases or decreases in SPF lumber. This could be the beginning of the fall in prices or it could be the market taking a breather before more increases. For PT lumber prices, we've got a mixed bag with some dimensions decreasing while others are increasing steadily. Again, there's no telling where the market is headed except to say that many dealers have very light inventories, so when they jump in to restock, prices could surge.
- Panel products- Yellow Pine plywood took a small decrease this week which seems like the first in many months, while OSB products were steady. Supply issues that plagued OSB (and caused much of the increases) seem to be resolving somewhat. Huber products (Advantech & Zip sheathings) are still holding strong at very high prices.
- Steel stud manufacturers have announced a 10% increase for May 2. This is the first increase in 4 or 5 months where we even saw one price decrease!
- Some roofing manufacturers are gearing up for another increase on shingles- in the 8-10% range for April/May.
- Rockwool insulation is announcing a 12-20% increase on Comfortbatts and Safe-n Sound products effective 4/1 and another 15% on May 22!
- Polyiso rigid sheathing (Hi-R sheathing) is increasing this month 10-15%.
- Our Sherwin Williams paints, both Valspar and Best Look, took an increase this past month.
- Big Timber screws, structural and specialty, will increase again on April 1.

### Brain Builder: See if you can figure it out!

You are driving a bus. At the first stop, two women get on. At the second stop, three men get on and one woman gets off. At the third stop, three kids and their Mother get on, and a man gets off. The bus is gray and it is raining outside. What color is the bus driver's hair?
